Fancy a new bathroom?

Products, details, assembly instructions,
brochures, downloads – everything at a glance:
www.duravit.com

A woman with blonde hair, wearing a white long-sleeved shirt, a white tank top, and white shorts, is walking barefoot on a wooden floor in a modern bathroom. She is looking down and smiling. To her right is a dark wood vanity with a white countertop and a sink. In front of the vanity is a dark wood rolling cabinet with a white towel on top. The background is bright and minimalist.

Fancy a new bathroom?

A Duravit bathroom.

Everything for a beautiful bathroom. Sanitary ceramics, bathroom furniture, bathtubs, shower trays, whirlpools, lighting systems, accessories: Duravit products do more than make living bathrooms more attractive. This is because they are particularly well designed and particularly high quality – which means they can be enjoyed for a long time to come. Here is an overview of all of our ranges.

A beautiful bathroom is like a holiday. There is something new to experience every day.

Living bathrooms. The Duravit brand. Holidays are like all beautiful moments in life – they are over far too quickly. What wouldn't you give to have somewhere you could escape to for a mini break – even several times a day? Somewhere you go in order to relax, refresh yourself and just to feel good. A spa for the home where you can enjoy beneficial water and wellness treatments. A dream bathroom that, with ultimate fusion of aesthetics and practicality, makes life a little more comfortable – and that can be as relaxing and refreshing as a mini break. And if that isn't enough: compared with holiday memories that will inevitably fade, Duravit washing areas, WCs, bathtubs and furniture offer one crucial advantage: they are here to stay. This is thanks to the extraordinary high quality, high-end materials, careful manufacture and, last but not least, timeless design of Duravit products.

Life is an adventure.
Ours started in 1817.

The tradition of the Duravit brand. Even a company that has set great precedents with its centuries-old tradition once “started small.” It all began in Hornberg, Germany in 1817 when Georg Friedrich Horn built an earthenware factory initially focused solely on the manufacture of crockery. In 1956, production evolved from earthenware to porcelain, extending the product range to include sanitary ceramics. This provided a platform for future success and also introduced the sanitary world to a new name: Duravit. Today, Duravit AG operates at an international level and boasts 10 production plants with a workforce of more than 5,000 employees worldwide – an indication of Duravit’s tremendous evolution, which has always been rooted in a “tradition of innovation.” And Duravit continues to demonstrate its eagerness to charter new territory with its innovative technology, extraordinary design and the development of new product segments.

Working on the perfect form...
with the best designers in the world.

The Duravit design brand. How do we actually recognize good design? After all, individual tastes can be so very different. Nevertheless, certain attributes serve as benchmarks and qualifiers for innovation. First, Duravit has been the proud recipient of numerous international design awards. These awards celebrate bold design, which has become Duravit's hallmark over the years. Second, there are the designers themselves. Each designer is a specialist in his field – a prominent global innovator with an inherent sense for good design. Good design, as Duravit and its designers see it, is never at the expense of practicality – neither is interested in “design for design's sake.” And third? That's you, the bathroom user, and your own set of needs and requirements. Thanks to an ongoing dialogue with its trade partners and sanitaryware dealers, Duravit is best able to address these needs and requirements in the brand's designs. Simply put, Duravit recognizes good bathroom design by the fact that it seems specially-created to suit all individual tastes.

How can we face the future with ease?
By acting responsibly.

Duravit and sustainability. Today, everyone's talking about environmental responsibility – a practice that Duravit has championed for years in its selection of materials, technological applications and production methods. Sustainability is the very reason Duravit continues to work with sanitary ceramic, a material that dates back to 8,000 BC. Today, the manufacture of Duravit sanitaryware ceramic continues to employ the same basic materials – clay, kaolin, feldspar and quartz – a set of natural, regenerative substances. This fusion of Duravit's environmentally-friendly production technologies with the company's meticulous quality control results in products that are highly functional and long-lasting. At Duravit, sustainable materials, modern expertise and the foresight to recognize what will be important tomorrow comprise the essential ingredients for beautiful – and responsible – living bathrooms.

There's no place like home.
And we'll make sure this continues.

The region behind the Duravit brand. One source of Duravit's tremendous strength, which it continues to cultivate, is its deep connection to the Black Forest. For Duravit, living in harmony with nature is the most natural thing in the world. This is why Duravit is, for example, a partner and sponsor of the Black Forest natural park, a large nature reserve that is also Germany's largest natural park. Additionally, Duravit does everything possible to protect natural elements like water, air and soil – a process that starts with resource-saving manufacturing methods, which employ technologies such as water treatment and heat recovery. The logical continuation of this is manifested in the products themselves, which are water-saving. Even with new products, Duravit takes into impact on the environment and ensures that, whatever it manufactures, it uses natural resources responsibly. And these efforts have certainly been recognized: Duravit AG has officially been certified for its commitment to the environment in accordance with ISO 14001.

We are a sponsor of the Black Forest
Nature Park Central/North

Welcome to Duravit. In Hornberg, in Meissen, in New York – in fact, anywhere in the world.

The international breadth of the Duravit brand. Perhaps at a time when the world is getting smaller by the day, it may not be so unique to have production plants and showrooms around the globe. Nevertheless, we are more than a little proud to be able to welcome you to our showrooms in Manhattan, Paris or Shanghai. On the other hand, you don't actually have to be in a metropolis in order to step foot inside the Duravit world. The Duravit Design Center, located in Hornberg – at the heart of Germany's Black Forest – offers a very authentic Duravit experience. Designed by Philippe Starck, The Duravit Design Center showcases bathrooms, building history and design options over an area of more than 1,500 m². Another option is to visit Duravit's 600 m² showroom in Meissen, where you can find out everything you want to know about our bathroom and wellness products. Both showrooms have one thing in common: they offer you an opportunity to create your very own Duravit dream bathroom. And—you can even try out the products for yourself! Why not make an appointment?

Duravit Showrooms in (1) Hornberg, (2) New York, (3) Meissen and (4) Paris.

2nd floor

Bathroom and home enhancement: with flat forms and warm wood finishes, the entire 2nd floor range ensures an elegantly furnished bathroom.

We no longer consider the bathroom a separate, isolated room, but instead an open, cozy seamless space. With **2nd floor**, Sieger Design and Duravit pay tribute to this idea. A combined high-quality design collection and comfortable furniture range, 2nd floor uses simple means to design an elegant, inviting room. Its many warm wood elements provide an engaging contrast to the white of the ceramic and sanitary acrylic. Thanks to a variety of available dimensions and options, it is possible to create an attractive washing area in every architectural situation, including smaller rooms, such as guest bathrooms and powder rooms.

Design by Sieger Design

(left) The 2nd Floor mirrors and mirror cabinets feature light strips on each side that ensure optimum illumination. (1) The console basin with console. (2) The drawers with soft-close function are easy to use and are a feature of the mobile storage unit and all other furniture. (3) The optional matte stainless steel surface finish for the inner basin creates a sleek look while maintaining optimum easy-care properties. (4) The built-in basin with console and additional towel rail, 50 cm or 100 cm. Practical: The towel can be removed from the front. Wood finish: ebony (real wood veneer).

(below) The 2nd floor furniture range embodies sheer elegance. The tall cabinet, which provides ample storage space behind its mirrored cabinet doors, is shown here in the rosewood (décor) finish. Light strips at each side ensure optimum lighting. The modular dimensions of the furniture in widths of 40, 60, 80 and 120 cm are carefully thought-out. **(top)** Each detail of the bathtub is simultaneously chic and practical. The "invisible" outlet, which can be lifted, is concealed beneath an acrylic cover, thus making cleaning incredibly easy. The necessary tool is included. The bathtub is also available with optional waterfall tap.

The 120 cm-wide washbasin vanity unit offers lots of storage space within its two fully extendable drawers. The matching washbasin is available for one tap fitting or as a double washing area.

2nd floor is warm and inviting in the Limed Oak finish (real wood veneer). Here, too, the room derives its energy from the fusion of ceramic, acrylic and wood – the symbiosis of elegance and comfort. Everything stays spic and span thanks to plenty of great storage ideas, like the wall-mounted board below the washbasin and the drawer integrated into the bathtub panelling, which creates a convenient space for towels and toiletries.

(left) A contemporary washbasin form: the 58 cm wide 2nd floor console basin plus console. The chrome support serves simultaneously as towel rail. A wide range of WC solutions: **(1)** Floor-standing bidet and WC in the Vario version, with visible cistern and connection that fits flush with the wall. **(2)** Wall-mounted bidet and WC. **(3)** Floor-standing bidet and WC. **(4)** Floor-standing bidet and WC for in-wall cistern. The SoftClose mechanism comes standard on all WC seats and lids (small picture).

* More information about 2nd floor

Overview of furniture finishes	>page 272
Bathtubs and shower trays	>page 198/256

Available in myriad dimensions and versions, 2nd floor offers unique solutions, ranging from pure ceramic to vanity unit, large master baths to small powder rooms. **(left)** The "classical" washbasin with ceramic pedestal. The surround at the edge of the basin functions as a convenient storage surface. **(1)** Handrinse basin plus all-around wooden panel in the Limed Oak finish (real wood veneer). **(2)** Washbasin with wall-mounted vanity unit. **(3)** Handrinse basin with floor-standing vanity unit. **(4)** Washbasin with ceramic semi-pedestal.

Looking for a certain ambiance in the bathroom?
The innovative e mood light system provides intelligent
solutions that are elegant, wireless and easy to operate.

e-mood

Light has a lasting influence on a room's atmosphere— particularly in the bathroom, a place for peace and relaxation. This was the concept behind the development of e-mood, the new light system from Duravit. An elegant furniture range on the outside, e-mood has many hidden talents, including a mirror program, power outlet, unique accessories, and a light system with perfectly coordinated individual elements. Both innovative and multifunctional, the various elements that make up e-mood can be combined as required to meet individual needs.

Design by Andreas Struppler

The basic multifunctional e-board can be expanded as desired. Its functions: **(1)** paper towel dispenser **(2)** power outlet **(3)** hinged compartment for cosmetics **(4)** practical shelf with integrated soap dispenser.

* More information about e-mood
 All dimensions and order numbers >page 297
 Overview of furniture finishes >page 272
 Bathtubs and shower trays >page 198/256

(above) e for electronics: e-mood provides practical and atmospheric light, as shown with the e light element. **(top)** e for emotion: alternating colored lights can be created by means of preset programs. The system is operated by a touch LED switch. The individual elements can communicate with each other wirelessly by radio or via a bus data system so that if the light in one element is changed, all of the others follow suit.

e for elements: although the system can be extended at any time, the individual e mood products also stand alone. **(1)** e-mirror plus e-board **(2)** e wall storage unit, which can be also be used as a room divider **(3)** the impressive illuminated e screen glass partition **(4)** e-cabinet plus e-board mirror cabinet. e for energy: the night mode is practical and economical by subtly lighting the bathroom if needed at night.

Real wood in the bathroom – something that is increasingly in demand by people who want a warm, inviting and comfortable home. The **Fogo** bathroom furniture range sets precedents in good design. It brings comfort to your fingertips with five real-wood finish options. The consoles, vanity units, tall cabinets, mirror cabinets and mobile storage units not only share their natural real-wood look, but also their sleek, clean lines. Meticulous craftsmanship down to the very last detail ensures enduring beauty.

Design by Duravit

Fogo

Real wood: with its pure, engaging design and beautiful real-wood finishes, the Fogo bathroom furniture range perfectly combines aesthetics and comfort.

(right) The Fogo mirror cabinet with surface-mounted light, socket and sensor switch, available in widths 60, 80, 100 and 120 cm. The mirror cabinet features a translucent shelf with an integrated indirect light source that illuminates both the inside of the cabinet and the washbasin beneath. A special feature: the distinctive look of the Fogo front is echoed in the mirrored doors. The mobile container with large handle and smooth-closing pull-out compartment and interior drawer. Finish: Limed Oak (real wood veneer).

Vanity units to match the Vero washbasins are available in widths 45 cm to 120 cm.

The furniture console, shown here in American Walnut (real wood veneer), is available in varying widths up to a maximum of 200 cm. In this variation, the console supports become practical towel rails. The console basin (width 100 cm) from the Vero range is available for either one or two tap fittings.

You can never have enough storage space in the bathroom. Fogo offers a variety of practical and attractive solutions, e.g.: **(left)** washbasin vanity unit with large interior drawer. **(1)** Console with drawer in Limed Oak (real wood veneer). **(2)** Semi-high cabinets, closed, 80 x 50 x 25 cm. **(3)** When opened, the semi-high cabinets reveal lots of extra space in the cabinet door, as well as functional glass shelves with rims. **(4)** Console with abundant storage space and practical towel rail. Finish, apart from with (1): American Walnut (real wood veneer).

(left) The vanity units and all Fogo furniture match the consoles and feature distinctive chrome handles. (1) There is an extra drawer inside the pull-out unit of the vanity, which helps keep things even tidier. (2) Thanks to the glass shelves with rim, the inside of the 8 cm thick cabinet door offers space for all smaller bathroom toiletries. The robust hinges are easy to adjust. (3) With dimensions of 176 x 50 x 42 or 23 cm, the tall cabinet proves to be a particularly spacious storage miracle.

13 American Walnut

24 Macassar

26 American Cherry

65 Bleached Oak

93 Ash Olive

Variations in real wood: Whether it's warm and inviting American Cherry, dark and sophisticated American Walnut or Macassar, understated Lined Oak or the extravagant wild grain of Ash Olive, the five different Fogo finishes offer something for every taste.

Vero

Consistently rectangular, consistently successful: the Vero range of ceramics is the archetype of minimalist form and a modern classic.

Cinema screen or computer monitor, fridge or milk carton, a room, a table, this brochure: our world is inconceivable without the rectangle. Perhaps this is why we are so attracted to **Vero**: the forms of this ceramic range are entirely restricted to the rectangle. It's a restriction that gives rise to new possibilities: this is because Vero is one of the most versatile ceramic ranges of all time. With minimalist design at its core and the strong support of Duravit's ceramic tradition and expertise, Vero is impressive in terms of its form, function and quality.

Design by Duravit

(left) Minimalist and chic: the rectangular Vero washbasin marks the beginning of a complete range of ceramics, shown here with chrome support frame and designer siphon. **(top)** Washbasins and handrinse basins are supplemented by an extensive range of WCs. Shown here is the Vero floor-standing bidet and WC with convenient cistern and automatic SoftClose seat. **(small image)** The Vero urinal with cover makes a hygienic addition to private bathrooms and powder rooms. This, too, adopts the principle of the right angle.

(below) Attractive alternative to the "classical" washbasin: the Vero console basin with tap panel is glazed at the back and can thus be positioned free-standing in front of the wall or in front of a large mirrored surface. **(right)** Bidet and WC in wall-mounted versions. The toilet seat with automatic SoftClose system fits flush with the ceramic, creating a harmonious ensemble. The entire collection features the same design lines, just as **(below right)** the washbasin with vanity unit and the back-to-wall bathtub.

The Vero handrinse basin is available in a variety of options and is the perfect problem-solver wherever space is particularly tight.

The form of the right angle is suitable for all room layouts – and, thanks to the myriad dimensions in which Vero is available, it provides an ideal solution for smaller rooms, guest bathrooms and powder rooms. **(left)** Vero handrinse basin and WC. The handrinse basin is available in widths 25 to 50 cm and in various options, such as **(1)** a narrow projection **(2)** along the wall, with tap fitting at the side and **(3)** with larger inside basin and a larger storage area. **(4)** The Vero built-in washbasin can be inserted from below into panels made of any conceivable material. The Duravit design siphon and matching corner valve complete this eye-catching look **(1)**.

Minimalist and comfortable: Vero in combination with bathtub panelling and vanity units in a matching design. Choose from all real wood and wood décor finishes from the Fogo and X-Large ranges.

* More information about Vero

All dimensions and order numbers >page 325/356
 WonderGliss >page 265
 Bathtubs and shower trays >page 198/256

Vero – how to transform 90° angles and 100 % Duravit quality into 1,000 great washing area ideas. **(left)** Vero washbasin with chrome support frame, two legs, height adjustable, with all-round rails as towel holder. **(1)** Console basin with two tap fittings on the console. **(2)** The classic wall-mounted washbasin with extra-large inner basin, raised ceramic wall and three-hole tap fitting. **(3)** The classical wall-mounted washbasin, pure and simple. **(4)** Double washing area solution with two console basins.

Mirrorwall

Washbasin plus mirror plus lighting plus storage: Mirrorwall offers it all in a striking one-piece lightweight unit.

The bathroom is the place we go to rejuvenate, relax, and prepare for a new day – daily rituals we couldn't achieve without bathroom essentials like the washbasin, mirror and light. Duravit's **Mirrorwall** combines all of these elements to create an ideal all-encompassing lightweight wall system for the bathroom. In creating Mirrorwall, designer Herbert Schultes combined his signature minimalism with graceful elegance through an unusual mix of materials such as glass, wood and ceramic fused with an intelligent touch LED light system

Design by Herbert Schultes

Mirrorwall provides a plethora of mirrored surfaces, inviting us to check our appearance from head to toe. The smooth ceramic facades of the spacious drawers provide an interesting contrast to the overall piece, and embody genuine innovation. **(top)** Practical option: the towel holder on the side of the console.

(left) The large mirrored surface of Mirrorwall makes the room look more spacious and clean. Behind the mirror and ceramic fronts is cleverly concealed storage space. (1) A continuous mirror surface is revealed at eye level behind the mirrored door. The doors feature removable wooden compartments. (2) For all types of toiletries. The drawers (3) and base units (4) underneath the furniture console provide additional space for towel storage.

Optimum bright and non-glare 500 lux lighting.

(left) A 500 lux clip-on lamp with specially-developed reflecting "sail" provides perfect illumination for those from 160 to 195 cm in height. Alternatively, two rotatable light columns (3) light up the mirror perfectly and in the right intensity while also illuminating the room. The indirect lighting of the optional side-mounted LED strip with changing color sequences (1, 4) provides additional atmospheric effects. The system is operated by touch LED (2) or optional wireless switch.

Happy D.

Archetypical bathroom design in the shape of a "D": a complete range of products with great value—to make everyone happy.

D for design
Sieger Design used one letter
to create an entire collection:
the Happy D. washbasin.

Why is **Happy D.** so successful? Perhaps because the range is reasonably priced in spite of its high design quality. Perhaps because Happy D. is such a versatile bathroom range. Perhaps because the D-shaped washbasin is unmistakable. Happy D. is to bathroom design what Bauhaus is to architecture: simple, elegant and timelessly modern — a veritable icon that has gained many friends and numerous design prizes since it was introduced.

Design by Sieger Design

The varied selection of products in the Happy D. range shows how an entire design universe can be created from a single letter: washbasins, console basins, handrinse basins, WCs and bidets in all sizes and variations, supported by an extensive furniture range. Despite its extensive options, the Happy D. range allows for simple planning. Its distinctive language also makes it possible not only to design for different room layouts but also for different furnishing styles.

Clear and uncluttered: the Happy D. bathroom is streamlined and sleek. This consistency in design is reflected in the bidet, WC and washbasin with design siphon and chrome towel rail underneath. The freestanding bathtub with acrylic panelling - also available with a whirlpool system - makes for a perfect centerpiece.

Part of the success of Happy D. can also be attributed to its extensive furniture range. The practical modular range and chic singular pieces are available in two designs. **(below)** The variable consoles provide a large design scope: with or without vanity unit, right or left, with washbasin or console basin. The vanity units are available in various widths, fitted precisely to the ceramic. **(right)** There are five finishes in real wood veneer, wood décor or white high gloss.

* More information about Happy D.

All dimensions and order numbers	>page 302/334/341
WonderGliss	>page 265
Overview of furniture finishes	>page 272
Bathtubs and shower trays	>page 198/256

Like the vanity units, the Happy D. consoles offer plenty of storage space, as does the wall-mounted tall cabinet (176 x 50 x 36 cm), shown here in American Cherry real wood veneer. The Happy D. bathtub is a true eye-catcher (**right**). It can be adapted to any room layout thanks to its various applications: built-in, back-to-wall, corner, undermount, and freestanding. Shown here with elegant panelling – available in four wood finishes or sanitary acrylic.

Starck X

More than luxury: Starck X by designer Philippe Starck maximizes minimalism to create a unique and incomparable bathroom range.

In mathematics the letter x stands for an “unknown” figure. In the Chinese Taoism, it represents elevation to deity. In bathroom design it stands for the start of a new era — and an exceptional bathroom range. **Starck X** by designer Philippe Starck maximizes minimalism — a minimalism, incidentally, that required expert-crafted finishing. It was worth the effort: the ceramics, furniture, bathtubs and accessories in the Starck X range exist in a category of their own. Is it luxury? Is it extravagance? Is it excessive? No, it’s Starck X.

Design by Philippe Starck

The crafted artistry that goes into Starck X is exemplified by the unusual shape of the range: the striking cylindrical washbasins have a diameter of 400 or 495 mm and rest on rectangular ceramic bases. Their sculptural character elevates them to unmistakable and inimitable works of art. **(small picture)** Alternative or addition? The rectangular Starck X washbasin for wall mounting, 705 x 520 mm, simple, pure and striking.

(left) The body of the tall cabinet (1760 x 500 x 335 mm) appears to “float” on the wall, while there are no handles to disturb its pure, clean look. The cabinet’s interior, available in white or platinum, has plenty of room for towels and toiletries. **(top)** Pure lines: the mirror (1106 x 766 mm) with integrated sensor-controlled lighting and the cubic, sculptured washbasin (705 x 520 mm). **(small picture)** The 1100 mm wide Starck X washbasin is unusual in design, proportion and color. Available in white or platinum, it doubles as an additional work area with enough room for all toiletries.

The consistency in design of Starck X ceramic is also exemplified in the WC. Like the washbasin and furniture ranges, the bidet and WC are cubic. An innovative detail: the recess on the bidet cover, which reveals the flat inset tap fittings. The fittings are unusually positioned, a factor that proved challenging but worthwhile for both the designers and engineers. The bidet and WC are available as floor or wall-mounted versions, both with the practical soft-close seat.

The outstanding focal point of the Starck X bathroom is the freestanding bathtub. See page 198 for further details.

* More information about Starck X

All dimensions and order numbers >page 308/347
 WonderGliss >page 265
 Bathtubs and shower trays >page 198/256

Rectangular, sleek and minimalist, the Starck X acrylic bathtub is an open invitation to indulge in luxury. Occupants can fully immerse themselves in the water thanks to an all-around overflow channel, which can be individually designed with stones (**left**) or teak inserts. The teak inserts are also available for the Starck shower trays (**small picture**). Remote-controlled lighting is a soothing option. And for the ultimate in pure lines, the freestanding version Starck X bathtub sets new precedent. (**above**).

Starck 1

Philippe Starck's design searches for the origin of things – the simple, natural, fundamental elements of life. With his Starck 1 range, he achieved just that...and almost immediately wrote bathroom history.

With **Starck 1**, Philippe Starck and Duravit have returned to the beginnings of hygiene, body care and wellness in addition to the evolution of the bathroom. The Starck 1 toilet, bathtub and washbasin are unmistakable descendents of their historic predecessors – the bucket, tub and washbowl – even though they have been completely reinterpreted. It's great to know that something good doesn't have to be "optimized": since their market launch in 1994, all products in the range – ceramic, furniture, tubs, accessories – have been meticulously crafted by hand using the same methods. This quality is nothing less than you would expect from a modern classic like Starck 1.

Design by Philippe Starck

The Starck barrel is available in two paint finishes (85 White High Gloss and 40 Black High Gloss) and in three warm real wood veneers (96 Pear, 13 American Walnut, 24 Macassar)

(top) The purity and minimalism of the design of the Starck 1 range is as unique as the individual products: this is perhaps most noticeable with the barrel-shaped washbasin with real wood finish. Alternatively, it is also available in Black and White High Gloss. With this and the other washbasin variants in the range **(left)**, a gentle movement sweeps through the ceramic washbowl, like a drop of water on a sheet of paper, forming a gentle recess.

* More information about Starck 1

All dimensions and order numbers	>page 311/334/349
WonderGliss	>page 265
Overview of furniture finishes	>page 272
Bathtubs and shower trays	>page 198/256

(top) Majestically minimalist: the freestanding Starck 1 bathtub (with/without whirl system) combines the simplicity of a semicircle and straight line to create movement and a distinctive rim. The sleek, attractive rectangular version is also suitable for installation in wall or corner applications. **(left)** Extravagance via reduction: the wedge-shaped urinal, available both with and without cover.

(top) The metamorphosis of a bucket: whether wall-mounted or floor-standing, the Starck 1 WC and bidet boldly reflect their heritage. A geometric contrast that features a clear and consistent reduced design: the seemingly monolithic cistern with the floor-standing WC. Fitted with the stop+go button and 6-litre flushing technology, it goes easy on water but not on hygiene. This comes with a matching WC seat with the comfortable SoftClose function

Starck 2

Reduced forms, attractive price. Or vice-versa. With the Starck 2 bathroom range, Duravit offers high-quality design in the mid-range price category.

A true Starck, but less elaborate: this was the inspiration behind the second Duravit – Philippe Starck collaboration. The result: **Starck 2**, a range of ceramics that is the ultimate successor to its famous predecessor, Starck 1. Starck 2 also derives its inspiration from the origins of bathroom design: the ceramic forms embody the flowing movement of water and allow us to see the bathroom through a new set of eyes. Starck 2 – the bathroom as a source.

Design by Philippe Starck

Sophisticated in form, diverse in application: thanks to its myriad dimensions and variants, Starck 2 provides countless attractive washing area solutions. **(left)** The handrinse basin with semi-pedestal, 38 cm wide, e.g. for guest bathrooms and powder rooms. **(right)** The washbasin with pedestal, 65 cm wide, for the spacious private bathroom. The circular built-in washbasin **(previous page)** is an attractive alternative. With a diameter of 47.5 cm and an installation depth of just 18.5 cm, it is ideal for smaller bathrooms in particular.

(left) Clever combinations create a harmonious bathroom ensemble: Starck 2 is compatible with other Starck ranges, such as the washbasin with Starck 1 towel rail shown here, and the vanity unit and mirror from the Starck 1.2.3. furniture range. **(top)** The front view of the washbasin reflects the unique geometric sweep of the Starck 2 lines, which echo the flow and movement of the water. The circular inner basin sits in a semi-oval, creating a large storage surface despite compact external dimensions. The 38 cm-wide handrinse basin **(small image)** is ideal for powder rooms.

The Starck 2 range consistently follows the design principle of "flowing water." As with the washbasin and handrinse basin, the forms of the WC and bidet also feature the sweeping lines that are characteristic of the range. The WC and bidet are available as free-standing versions with visible cistern (**left**) and in two variants: floor-standing (**small image**) or wall-mounted (**top**) for concealed cisterns.

Even more top-quality Starck at a great value: there's no doubt that, with the Starck 3 range of ceramics, Duravit has revolutionized the sanitary world. Starck 3 brings design to a segment where it was once an untouched concept with a vast array of products that meet all needs and tastes. And – the range provides better value for money than ever before. With more than 50 models and 64 variants, Starck 3 is one of Duravit's most extensive bathroom ranges. So, it only seems right that a range that offers so much requires its own brochure to illustrate its numerous applications, examples, and references.

Design by Philippe Starck

You will find detailed information in the latest Starck 3 brochure, which can be ordered free of charge and is also available to download from www.duravit.com/catalogs

Starck 3

Frequently copied but never matched. The Starck 3 range is and remains the measure of all things when it comes to design, variety and price

Thanks to the diverse Starck 3 range, designing an attractive washing area to meet individual needs and requirements couldn't be easier. **(left)** The washbasin with practical and easy-care, attractive low back panel and ceramic semi-pedestal. **(1)** The extra wide furniture basin offers lots of storage space and is available in sizes 70, 85 and 105 cm – here with floor-standing pedestal. **(2)** A clean and tidy solution: Starck 3 as built-in washbasin (not shown: also available as variant for installation from below). **(3)** The semi-recessed washbasin with a striking shape and deep inside bowl. **(4)** Slims down for small bathrooms or cloakrooms: the handrinse basin with semi-pedestal.

* More information about Starck 3

All dimensions and order numbers >page 314/334/349
 WonderGliss >page 265
 Bathtubs and shower trays >page 198/256

There is also an extensive range of Starck 3 WCs with numerous variants: **(left)** The Vario floor-standing WC offers various connection possibilities and fits flush against the wall. **(small images)** WCs for many application areas: barrier-free WC +100 and the Big Toilet, which sets new standards in terms of comfort. The Starck 3 urinals and the ceramic partitions are a hygienic addition, not only in public areas **(small images below)**. **(1)** WC and bidet in the wall-mounted version or **(2)** in the compact version with short projection. **(3)** Floor-standing bidet and WC for in-wall cistern. **(4)** Floor-standing bidet and WC with ceramic cistern

The benefit is in reduction – but this is no reason to relinquish comfort or quality. With the **Starck 1.2.3** furniture range, Philippe Starck and Duravit combine all of these attributes. In terms of design, Starck firmly believes in simplicity and uses the reduced and unadorned classic line as his platform for innovation, which is further highlighted by his use of vibrant colors and an innovative mix of materials, such as wood and plastic. With a formidable product range ranging from tall cabinet to mobile storage unit, Starck 1.2.3 not only perfectly harmonizes with all Starck ceramic ranges, it looks just as good with existing bathroom furnishings.

All dimensions and order numbers >page 320
 Overview of furniture finishes >page 272
 Bathtubs and shower trays >page 198/256

The interior drawers of the tall cabinet keep everything neat and tidy – and out of sight behind an attractive door front.

When combined with the Starck ceramic ranges, the result is pure harmony: **(1)** Vanity unit with two doors and central drawer combined with the 130 cm wide Starck 3 double washbasin. **(2)** 2-door vanity unit with Starck 1 console basin. **(3)** 1-door vanity unit with Starck 2 washbasin. The siphon is concealed behind an elegant chrome apron. **(4)** Mobile storage unit and 2-door vanity unit with Starck 3 washbasin. Furniture finish in all images: aluminium (plastic).

Architec

The basic architectural elements – the circle and the square – were the inspiration behind the Architec sanitary-ware range, which is ideal for a wide variety of applications.

Design by Prof. Frank Huster

Washroom hygiene is the result of visual appeal and practicality. Developed by Prof. Frank Huster, the Architec ceramic range is compliant with philosophy. The circle and square: two basic architectural elements that sufficed in creating a straight-lined, modern, abundant product range for almost any intended use, whether private, public or barrier-free. **(top)** The unusual diagonal cut of the Architec washbasin allows not only a generous storage surface but also more space in a smaller area **(left)**.

(left) The Architec washbasin is ADA compliant, as the siphon is flush-mounted to the wall. (top) A design idea that has a tremendous impact in a wide variety of forms: (1) Built-in washbasin with overflow. (2) Built-in washbasin with integrated tap panel. (3) Built-in washbasin without overflow. (4) Console basin 45 cm. (5) Console basin with integrated soap dispenser. (6) Console basin 50 cm. (7) Handrinse basin 36 cm wide. (8) Washbasin, diagonal. (9) Corner washbasin. (small image) Built-in washbasin fitted into the countertop from above.

Version with classic rim

1. Hygienic flushing jet
2. Easy installation
3. Ceramic covered slotted waste
4. Sensor for flushing and cleaning programs
5. Solenoid valve controls water flow
6. Intelligent sensor
7. Programmable electronic control unit
8. Waterproof battery compartment
9. Easy-clean urinal siphon

1

2

Originally developed for public areas, Architec shows what it's made of: the "intelligent" urinal is available with classic flushing rim **(1)** or with flushing jet and easy-to-clean rim **(2)**, with water inlet either from above or behind, or in a programmable electronic version. The form of the urinal proves particularly easy to clean. Extra practical for the operator: the interior siphon cartridge can be replaced quickly and easily from the front without dismantling the urinal.

Scola

Scola began its career in the classroom. Today, the washbasin is at home with people who value icons. In fact, Scola is the washbasin that has remained unchanged and included in the Duravit program the longest. It is popular, for example, in the private bathroom or utility room: the circular, deep inside basin offers lots of space to wash one's hands and the ceramic surrounds offer lots of storage space. The version with chrome support frame (**small image**) is a chic alternative to the wall-mounted washbasin.

* More information about Scola and Bagnella

All dimensions and order numbers
WonderGliss

>page 289/307
>page 265

Bagnella

And now for something completely different: taking the traditional washbowl as its starting point, Sieger Design created this Bagnella basin – circular, simple and already a timeless classic. The form of the console basin remains completely unadorned, while a broad, all-round rim serves as its striking feature. Bagnella can be combined with all types of consoles and counter-tops. The small chrome ring (**small image**) that accompanies the basin provides an elegant connection and also facilitates cleaning.

Duraplus

So you've got big plans for your bathroom but you're working within a small budget? The Duraplus ceramic range offers top Duravit quality at a moderate price, making it suitable for any renovation budget

* More information about Duraplus

All dimensions and order numbers	>page 293
WonderGliss	>page 265
Bathtubs and shower trays	>page 198/256

(left) The Duraplus washbasin profile: simple, unadorned, attractive. **(small images)** Maximum solutions in a minimum amount of space: The ultra short 22 cm compact handrinse basin, the 35 cm handrinse basin and the corner handrinse basin also fit in compact spaces. **(1)** Various washbasin sizes with standard projection or in the compact version. **(2, 3)** Like almost all models, the wall-mounted WC is available with flush-down, washout or cascade flushing, 6 liter technology. **(4)** The floor-standing WC with ceramic cistern and stop+go button.

With the **Bacino** console washbasin, Duravit set a trend that continues unabated today. A small but attractive range, Bacino enables both modern and distinctive washing area solutions for private bathrooms, powder rooms and hotels. Bacino can be combined with the Fogo furniture range, as well as with other console materials, such as stone, concrete or glass mosaic.

(1, 4) The purely cylindrical, barrel-shaped Bacino console basin, with Fogo console, wall-mounted and with drawers below. 46 cm high, 37 cm in diameter and a deep inside basin without tap panel and overflow make the basin particularly unique. The ceramic valve cover adds the ultimate finishing touch to the inside. (2, 3) The console basin in the "rectangular" variant with softened corners, also with furniture console. (right) Bacino as attractive double washing area solution.

The name says it all: X-Large offers a tremendous amount of storage space and endless possibilities for bathroom design without appearing weighty. And despite its name, XL furniture offers great solutions for XS bathrooms too.

X-Large

Design by Sieger Design

Every bathroom needs storage space. X-Large provides it in abundance while preserving the bathroom's spaciousness. X-Large's ingenious shape and special design features ensure that the furniture will always appear solid and durable while emanating a sense of buoyancy. This is thanks to its chic finishes, narrow consoles and furniture fronts made of translucent glass – all of which embody Duravit's top-quality craftsmanship. A diverse product range consisting of a wide variety of dimensions and combinations, X-Large has just the right storage solution for every room and every style, from the large private bathroom to the small powder room.

The Wenge finish (décor) gives X-Large a strikingly sleek appearance. The spacious washbasin vanity unit and low cabinets are 55 cm deep. There's plenty of storage space behind the drawers inside the furniture, while the siphon is easily accessible and concealed behind the chrome apron. The elegant mirror is available in widths 46 to 120 cm. Practical: the integrated glass shelf. Convenient: the integrated lighting.

(left) X-Large in White High Gloss (paint). To achieve the typical gloss effect, the furniture is painted several times. This process also applies to the new high-gloss Cappuccino finish (paint). The handles that extend along the entire width of the drawers and pull-out elements are a characteristic feature of the range. **(top)** Mirror and vanity unit, both 60 cm wide. The X-Large tall cabinet appears modern and lightweight thanks to its frosted glass door. X-Large looks particularly elegant in the Wenge (décor) wood finish, which creates a distinctive contrast to the aluminium handles.

X-Large in the Oak Anthracite (real wood veneer) finish. High-quality wood grain with a protective melamine coating yields furniture that is waterproof and easy to care for. **(below)** A floating effect is created thanks to an invisible attachment: the practical wall board in widths 60, 80 and 120 cm. **(right)** The vanity units, crafted for consoles and panel tops, feature a compartment with glass shelf; the siphon remains concealed behind a rear wall but is still easily accessible.

X-Large features a host of big ideas for small bathrooms. For example: **(left)** The 30-cm wide side cabinet with removable chrome basket for towels is ideal for the powder room. Shown here in Oak Anthracite (real wood veneer). **(top)** The handrinse basin vanity unit configurations with door or drawer with chrome basket make the guest bathroom or powder room even cozier; shown here in Teak (decor). The handrinse basins shown in both images are from the Vero range.

Light, friendly, natural: this is the effect of X-Large in Natural Oak (real wood veneer). **(left)** The vanity unit with long extending drawer offers enough space for two. To match: the mirror cabinet in 120 cm width. **(1)** The inside of the drawer – with self-closing function and SoftClose technology – can be individually designed with glass dividers and containers. **(2)** Vanity unit with Starck 3 washbasin (80 cm width) and mirror cabinet. The integrated light strips ensure optimum illumination. **(3)** Aluminium handle. **(4)** In combination with the Vero furniture basin.

X-Large is undoubtedly eye-catching in the new Teak (decor) finish. The tall cabinet – available in widths 30, 40 and 50 cm – is tall and deep, yet compact. It creates plenty of modern-looking storage space for both larger and smaller bathrooms. When paired with wall boards, a side cabinet, washbasin vanity unit and mirror, X-Large creates an incredibly versatile and inviting bathroom.

(1) Striking forms fused with modern technology: the wall-mounted WC for the in-wall cistern is available with washdown and washout flush and matching bidet. **(2)** The design idea behind the Darling washbasin is simply enchanting - modern but graceful with its sweeping curves. Shown here in the in-wall version. **(3)** The washbasin with ceramic semi-pedestal, alternatively also available with floor-standing pedestal. Available in widths 55, 60, 65 and 70 cm. **(4)** Floor-standing WC and bidet in the exposed version with visible cistern. **(small illustration)** The Fizz urinal with cover matches the range.

Big little bathrooms

What comes to mind when you hear the term "guest bathroom"? Cramped, functional, austere? At Duravit, we aim to correct these misconceptions by offering an array of flexible products for compact room layouts and innovative solutions for guest bathrooms and powder rooms, which come complete with properties such as: spacious, inviting, creative, cozy... and simply beautiful. See for yourself!

From the small room layout to a cozy place to unwind.

Because of their inherent space limitations, many guest bathrooms and powder rooms face unavoidable design challenges that leave them looking cramped or sparsely furnished. Duravit offers the ultimate solution to these constraints through its wide offering of flexible, design-conscious products. Depending on the available space, budget and personal preferences, Duravit can transform even the smallest powder room into a comfortable place to unwind.

Washing areas for every room layout. The washing area is at the epicenter of the bathroom, and Duravit offers an extensive repertoire – everything from handrinse and built-in washbasins with vanity units to countertop basins and matching consoles in various dimensions and styles – to address the design of the washing area. The Starck 1 range offers great ideas for exclusive guest bathrooms. The barrel-shaped washbasin (left) and furniture unit is already a classic and is available with five attractive surfaces: Macassar, American Walnut, American Pearwood and the new White Highgloss and Black Highgloss (paint) finishes.

You can find solutions for small bathrooms here:

Architec	> page 128
Bacino	> page 140
X-Large	> page 144

Ideal for the exclusive guest bathroom or for the holiday-home-style bathroom: the Starck 1 range, with washbasin and barrel-shaped vanity unit in American Walnut and the floor-standing WC with ceramic cistern and bidet. Practical: a glass shelf with rail provides lots of storage space, and all is concealed behind the vanity's two curved doors.

Great design in a small amount of space: the Starck 3 range also masters limited space with consummate ease by offering an attractive and petite handrinse basin and a compact wall-mounted WC and bidet. Designing an appealing powder room couldn't be easier! For more information, please go to the Duravit website or refer to our Starck 3 brochure.

Bathroom furniture creates storage space and ambiance: with compact dimensions, ingenious solutions and warm wood finishes, Duravit vanity units, tall cabinets, shelves and wall cabinets create a cozy guest bathroom.

The cozy guest bathroom. The guest bathroom and powder room achieve maximum comfort thanks to furniture elements such as shelves, storage surfaces and cabinets available in a wide variety of dimensions and designs to enable maximum flexibility. For smaller room layouts in particular, Duravit's creative bathroom furniture ideas are often the only way to create storage space or useful surfaces. Thanks to the large selection of different real wood veneers, décors and paint finishes, each bathroom can be customized to meet the user's individual taste. An entire range of matching mirrors and mirror cabinets, either with or without lighting, add the finishing touch to the perfect mini bathroom furnishings.

From the powder room to the second bathroom. With the addition of a shower tray, the powder room becomes a fully functional and comfortable bathroom that, if necessary, can also be used as second bathroom for overnight guests. With clever planning and the right products, it is often possible to transform a few square metres into a truly amazing bathroom. The Starck 1, Starck 2, Starck 3, Happy D. and 2nd floor ranges offer particularly suitable solutions.

Duravit also offers both functional and attractive solutions wherever space is at a premium with versatile ceramic options and bathroom furniture that offers lots of storage space.

Shorter projection, more space. Shorter projection, more space. Wherever space is particularly tight, WCs with a shorter projection are great problem-solvers. At Duravit, these are known as compact designs. A urinal is both a practical and hygienic addition to a bathroom, and, if installed in more private areas, is even available with a cover. The Starck model (p. 165), for example, is simple, attractive and incredibly practical.

Narrow dimensions, plenty of storage space. Duravit offers bathroom furniture with unimposing outer dimensions and a spacious interior in a wide variety of sizes, variations and forms. The Fogo, X-Large and Happy D. furniture ranges are just a few examples of the ultimate furniture solutions that await you! With the Happy D. washbasin vanity unit (right) in dimensions measuring 34 x 44 x 33.5 cm, glass containers on the inside of the door offer ample storage space for toiletries. Everything is held securely by a chrome rail.

What you have to watch out for in the cloakroom...

- * **Hospitality:** your guests will be more than happy with a few small accessories, such as soap dispensers, towel rails, etc., which are all included in the Duravit range of products.
- * **Creativity:** it's entirely up to you: many Duravit ceramic and bathroom furniture ranges can be combined to optimum effect.
- * **Color:** small bathrooms appear larger if you incorporate light colors, large surfaces or tile formats into your design.
- * **Cleaning:** Guest bathrooms can be easy to clean. All Duravit ceramics are also available with the easy-care WonderGliss coating.
- * **Climate:** a guest bathroom with shower can sometimes get a little damp. Duravit bathroom furniture finishes are more than a match for tough climate requirements.
- * **Dimensions:** however small the room, there's always space for a handrinse basin, WC or for a piece of Duravit bathroom furniture. Ask your local sanitaryware specialist for details.

1930 Series

Unashamedly nostalgic and yet timelessly modern: its octagonal design makes the Series 1930 a bathroom classic.

Design by Duravit

Octagonal means having eight corners. Ingenious means creatively outstanding. The Series 1930 is both. The Duravit product range would be incomplete without this classic, which was designed in the Golden Era and presented to the public for the first time in 1930. Over time, many charming pieces were added to Series 1930 to create the complete collection as we know it today. And yet, however consistently classic its look, Series 1930 epitomizes cutting-edge technology—as exemplified by its wall-mounted bidet and WC (top).

* More information about 1930 Series

All dimensions and order numbers	>page 284/335
WonderGliss	>page 265
Bathtub	>page 198

Just like the good old days: above all, the Series 1930 features skilled craftsmanship and consistent attention to detail. **(1)** The washbasin shape is the archetypical octagon, with sides that taper downwards. **(2)** The ceramic shelf is also octagonal. **(3)** Even the small bracket holding the towel rail has eight corners. **(4)** Bidet and WC in the floor-standing version with ceramic cistern, available with 6-liter and dual-flush system. **(right)** The built-in bathtub, 180 x 80 cm.

Is it design? Is it architecture? Whatever it is, it's a real Norman Foster. Sensational, like all of his work, which includes the likes of London's Stansted Airport, the Hongkong & Shanghai Bank and the new German Reichstag. For Duravit, the architect/designer has created a range that redefines the bathroom. Bathroom_Foster is defined by the geometry of two adjacent circles. The basin features a fine edge and a generously proportioned interior – an example of design that transcends its basic purpose. As for creating an ambience: Bathroom_Foster fits effortlessly into all modern bathroom interiors.

Design by Norman Foster

Bathroom_Foster

When a top architect and designer like Norman Foster designs a bathroom range, it's normal to expect something really special – like Bathroom_Foster.

* More information about Bathroom_Foster

All dimensions and order numbers >page 301
 WonderGliss >page 265
 Bathtubs and shower trays >page 198/256

The oval is predominant in the Bathroom_Foster range, demonstrating consistency fused with flexibility. **(left)** The basin is enthroned upon a console, the built-in washbasin, inserted from below, creates storage space **(small image)**. **(1)** Floor-standing bidet and WC with visible cistern. **(2)** Washbasin with ceramic semi-pedestal. **(3)** Floor-standing bidet and WC for in-wall cistern. **(4)** Wall-mounted bidet and WC.

A mirror cabinet shows us our reflection, and this differs greatly from one bathroom user to the next. Our tastes in and requirements for such items tend to differ just as much. The **Multibox New** range of mirror cabinets meets these requirements with individuality in both form and function. With the help of each individual element, anyone can put together his or her own unique mirror cabinet ensemble. In addition to the classic version, Multibox New is also available in a built-in version, which is ideal for narrower rooms and in combination with shallow washbasins. In both cases, it is possible to choose between four different widths and either a two or three-door version; all versions feature the soft-edge design.

Design by Duravit

 Bathtubs and shower trays >page 198/256

Attractive on the outside, flexible on the inside: **(left)** The inside of Multibox New features glass shelves and a chrome rail. The insides of the doors are mirrored. **(1)** The base of the built-in version features a White Aluminium (décor) finish, which serves a dual purpose as all-encompassing cabinet frame. **(2)** The practical nightlight function. **(3)** The classic version features an open shelf with an optional socket. **(4)** The socket inside the cabinet can be used, for example, to plug in an electric toothbrush

Caro

When purity becomes an experience: reduced forms and a distinguishing sweeping movement make the Caro ceramic range ideal for elegant bathrooms.

* More information about Caro

All dimensions and order numbers	>page 290
WonderGliss	>page 265
Bathtubs and shower trays	>page 198/256

(left) Reduction yields profusion: thanks to the gentle sweeping movement of its generous basin form, the Caro range appears as elegant as it is modern. **(1)** The washbasin is available in widths of 60cm, 70cm and 90cm, with a ceramic pedestal or semi-pedestal. **(2)** Wall-mounted bidet and WC, the latter of which features water-saving 6-liter technology. **(3)** Consistency with the built-in washbasin, too: small basin with lots of surrounding space. **(4)** Ideal for the guest bathroom and powder room: thanks to the slim-line dimensions of the handrinse basin with semi-pedestal, all available space is used, regardless of its compact size. **(previous page)** The floor-standing WC with ceramic cistern and inner plastic tank is particularly quiet and creates almost no condensation. It is a particularly ideal solution for warmer climatic regions.

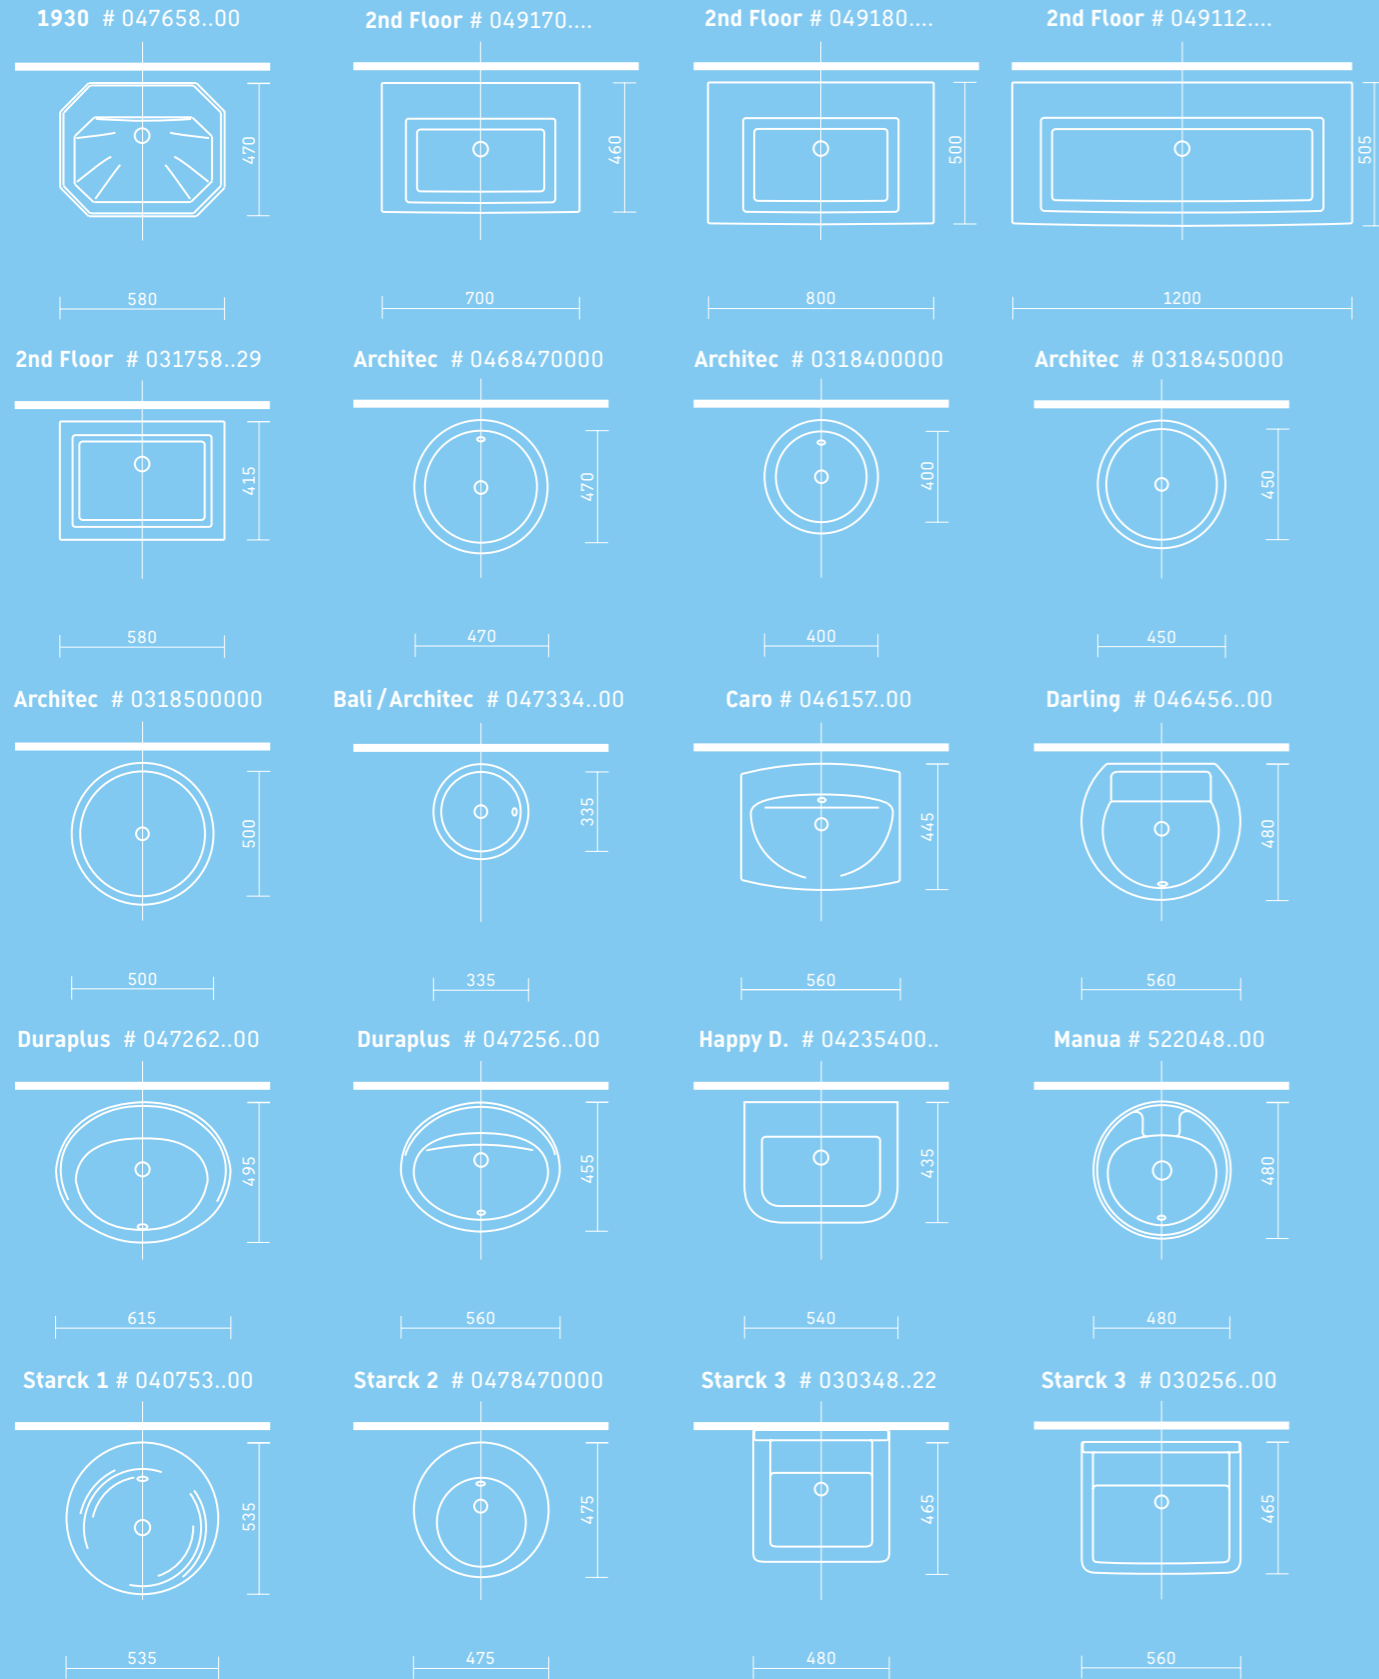

Clean, compact, tidy: built-in washbasins create lots of storage areas that allow for optimum use of the room. Built-in washbasins can be combined with wood, glass and stone countertops – or can be matched with many Duravit bathroom furniture ranges.

Built-in washbasins

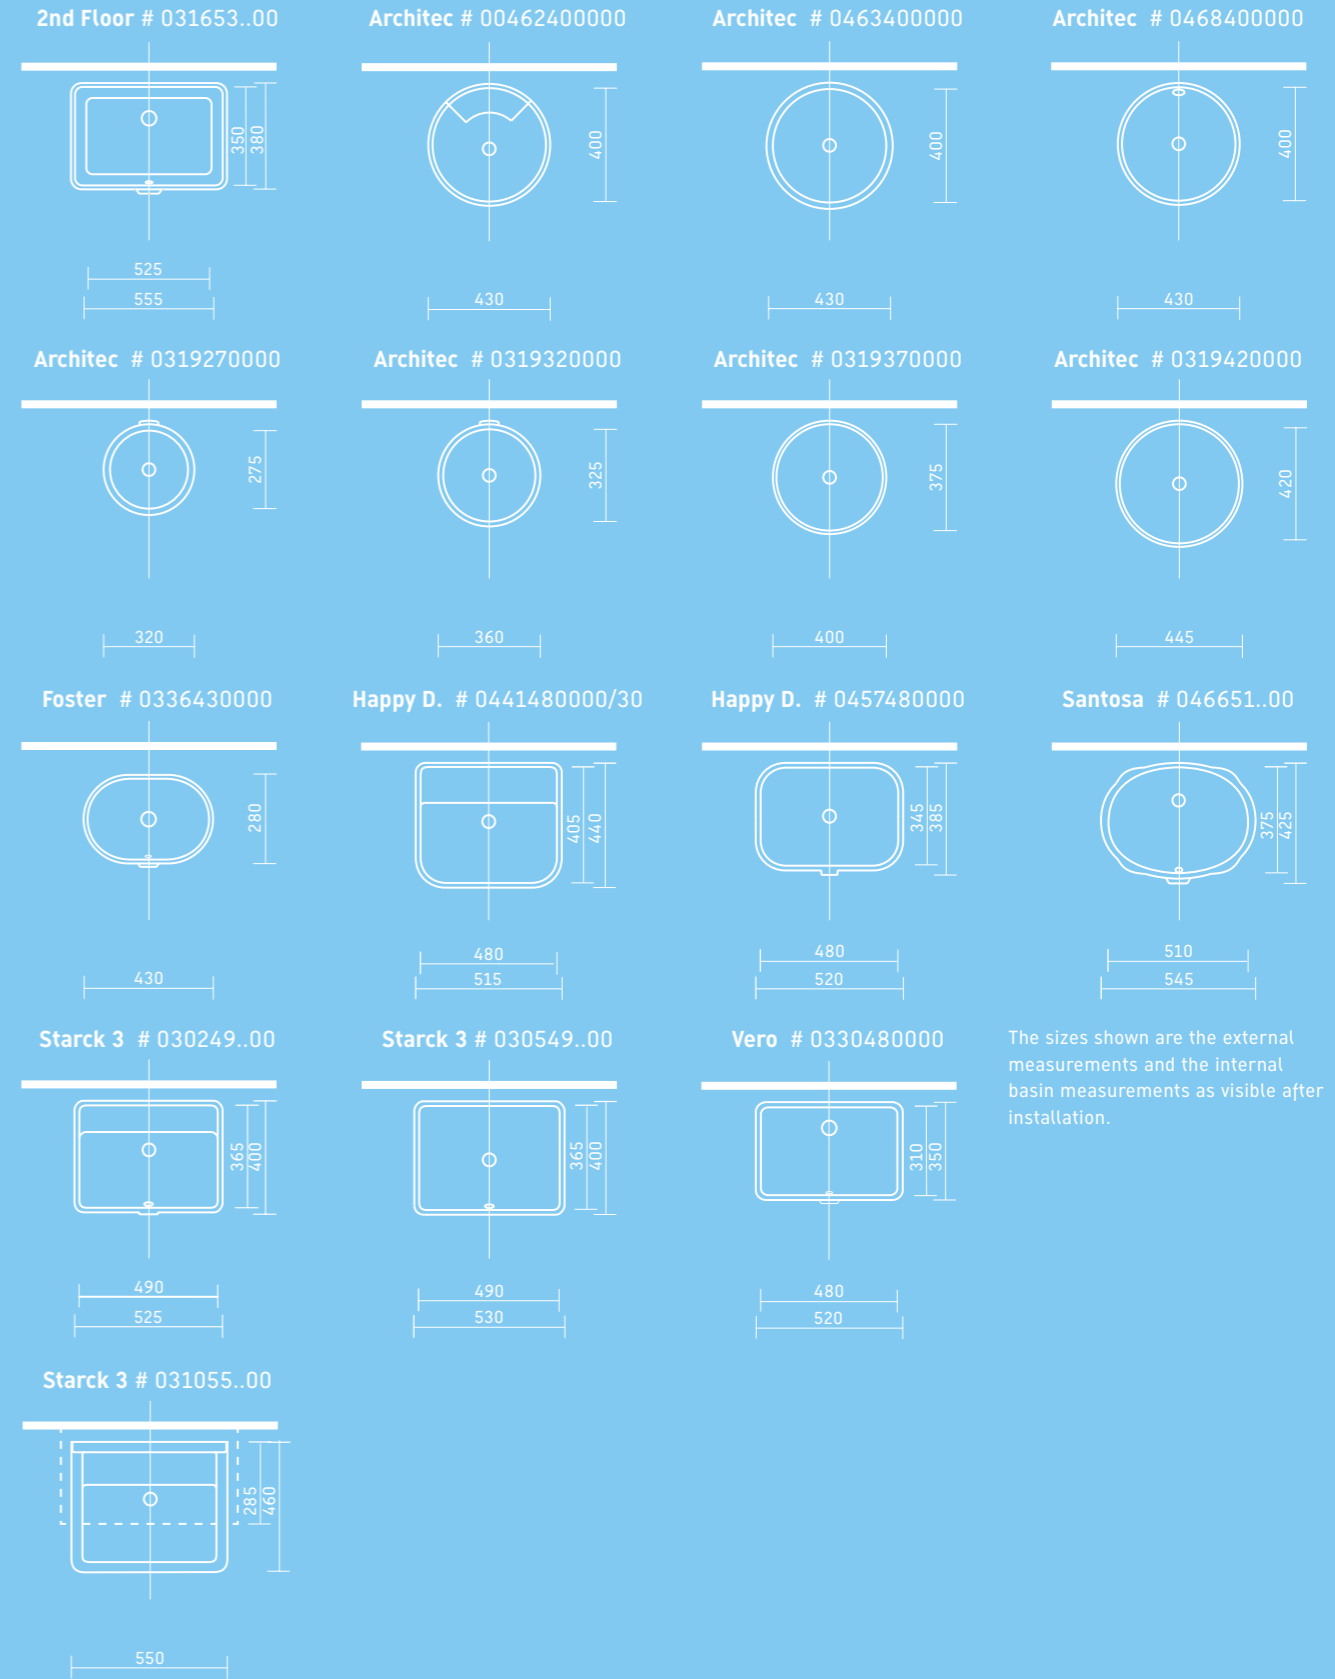

When ground flat, Duravit built-in washbasins sit flush on countertops. When dropped into the countertop or vanity unit, the washbasin edge fits just perfectly on the surface, creating a large storage area. **(1)** Alternatively, some washbasins are inserted into the countertop from below and are fixed into position underneath the countertop. This installation is particularly easy to clean and is practical for hotel and public space applications. **(2)** The semi-recessed washbasins offer yet a third alternative **(3)**.

(1) Built-in washbasins from above

(2) Built-in washbasins from below

(3) Semi-recessed washbasins

The sizes shown are the external measurements and the internal basin measurements as visible after installation.

All sizes are external basin sizes.

A close-up photograph of a modern, white, cylindrical console basin. The basin is mounted on a light-colored wooden vanity. A sleek, chrome faucet with a single-lever handle is positioned behind the basin. The background is softly blurred, showing a window with blinds and a bathroom setting. The overall aesthetic is clean and contemporary.

Console basins

At one time just a trend...but now the bathroom would be unimaginable without them. Today, console basins are an attractive and modern alternative to the wall-mounted washbasin.

* More information about built-in washbasins and console basins

It may sound banal, but we want you to feel completely comfortable and relaxed, whenever possible – and we don't want you to have to go find a public spa to achieve this. Rather, we want you to enjoy relaxation and comfort at home, in your own bathroom. This is why Duravit has developed bathtubs and wellness systems that leave nothing to be desired – neither in terms of function nor form. Like all Duravit collections, the bathtubs and wellness products comprise high quality materials, workmanship and functional finesse while exemplifying our inherent and intuitive feel for good design. Wellness for body and spirit, for the mind – and for the home: we hope you enjoy Duravit's bathtubs and wellness systems.

Your very own home spa

Everything about bathing, whirlpool and showering pleasure from Duravit.

Free-standing bath tubs

The centerpiece of the room: a free-standing bathtub from Duravit makes a true statement wherever it can be accommodated.

Philippe Starck bathtub
with apron, 180 x 80 cm

(top) Not just pleasing to the eye: the minimalist Starck bathtub with apron, 180 x 80 cm, introduces new purity to the bathroom. Like all Duravit bathtubs made of high-quality sanitary acrylic, its warm surface feels pleasant to the touch, creating a feeling of relaxation right from the start. (previous page) The Happy D. bath with inviting bath panelling in American Cherry (real wood veneer).

The free-standing Starck X bathtub makes a clear statement about design, luxury and wellness. Available in three versions: as one- or two-seater, with or without all-around water channel. With this version, the bathtub can be filled with water right up to the rim – a wonderful feeling for bathers, since the entire body becomes surrounded by water and warmth. The water channel is available with teak inserts (**top**) or with specially-treated stones (**left**) and optimum colored lighting. Of course, the Starck X bathtub is also available without water channel as free-standing bathtub with overflow.

Flexible in terms of look and equipment: the bathtubs in the 2nd floor range are available in various sizes, ranging from 160 x 70 cm to the two-seater 200 x 100 cm. **(left)** Here, water is supplied via the Duravit tap pillar, which matches the bathtub furniture panels in the Ebony (real wood veneer) finish. **(top)** The bathtub in Limed Oak (real wood veneer) in special size 210 x 90 cm offers lots of storage space and a practical drawer. The optional tray with book support proves particularly comfortable when reading in the bath. When it is not in use, the book support is fastened invisibly with magnets on the back of the tray.

Back-to-wall bathtubs

Perhaps the most beautiful thing to be paired with a wall: a Duravit back-to-wall bathtub, available in many different forms, finishes and versions.

Happy D. bath 180 x 80 cm with integrated panel.

The back-to-wall version of the Happy D. bathtub adopts the "D" of the range its design feature. With bathtub panelling in American Cherry (real wood veneer), an inviting alternative to the molded apron made of sanitary acrylic. The furniture panelling is available in four wood tones to match the Happy D. bathroom furniture. It is simply slotted onto the bathtub and attached to the support frame with magnets. For maintenance purposes, the panelling is just as easy to remove.

2nd floor also offers lots of comfortable details in the back-to-wall version. **(1)** The innovative outlet, concealed by a sanitary acrylic cover, is opened and closed with a simple tap. Like the overflow **(3)**, the optional waterfall tap **(2)** is integrated into the bathtub. **(4)** The ensemble comprising step and practical support doubles as a towel rail and offers comfort for every age. **(right)** With Ebony (real wood veneer) bathtub panelling.

Taking a bath together can be fun, and also really comfortable – a nice option is the Starck two-seater, 200 x 100 cm, which features two backrests. The 30° backrest angle is proven to be ergonomic and particularly conducive to relaxation. It is even more comfortable with the optional neckrest, which is fixed to the bathtub with suction pads. And for all those who prefer to enjoy a bath alone: the Starck bathtub is now also available as a one-seater, starting at a size of 150 x 70 cm.

As with the rest of the range, the sleek Vero rectangular tubs are eye-catching in terms of design. Vero is simple and unadorned – which is precisely why it is so attractive. No compromises must be made, even in terms of comfort: Vero features the ergonomic 30° backrest for ultimate relaxation. Vero back-to-wall bathtubs are available in four sizes, ranging from 170 x 70 cm to 190 x 90 cm. **(top)** With bath panelling in Macassar (real wood veneer). **(small illustration)** The broad bath rim is ideally suited for installing tap fittings. Bathtub panelling in Natural Oak (real wood veneer).

Built-in bathtubs

We design the bathtub, you choose the trimmings: an attractive built-in bathtub from Duravit is the logical choice for all creative interior design ideas.

(top) The Happy D. built-in bathtub, combined with a plinth of mosaic tiles. For design purists, the bathtub is available in the distinctive Happy D. form with high rim **(1)** and, alternatively, as a classic built-in version with low rim and rectangular outer contour **(2)**.

(top) The built-in bathtub from the Series 1930 with archetypical octagonal interior shape, sitting in a natural-stone plinth. The tap fitting sits on the rim of the bathtub. Like all Duravit built-in bathtubs, both bathtubs are available with integrated whirl system upon request.

Starck built-in bathtub, rectangular, 200 x 100 cm

Starck built-in bathtub, rectangular, 170 x 70 cm

The built-in rectangular bathtubs from the Starck range. Straight-lined, minimalist, reduced to the essentials – all to provide the bather with maximum comfort. **(top)** The one-seater with ergonomically tilted backrest at a 30° angle, here with optional neckrest. **(small illustration)** The Starck two-seater with dimensions 200 x 100 cm is extremely comfortable because it's extremely spacious. Thanks to the tub's form when it accommodates two backrests, the required water volume is significantly small, yet efficient.

The Daro built-in bathtub, which is shown here as a two-seater measuring 180 x 80 cm, has one particularly comfortable special feature. The two backrests with 30° tilt are also rounded inwards: this means it's even more comfortable to lie back and relax. Daro looks great with many of Duravit's ceramic and furniture ranges.

Not without reason, 2nd floor is regarded as an extensive and diverse range. There are also various built-in baths to choose from, shown here in dimensions 170 x 75 cm and combined with a tiled plinth. Like all Duravit built-in bathtubs, it is also available with integrated whirl system.

Corner baths

The corner bathtubs from Duravit make maximum use of the space in the bathroom. And if that's not enough, they also look amazingly good!

Exterior: hexagonal. Interior: oval. The bottom line: extreme comfort. Thanks to optimum use of the room – minimal bathtub rim, maximum interior – the 2x3 corner bath offers lots of space: for one person to relax and meditate, or for more to splash about and have fun. An ideal bathtub for families or those who prefer relaxing in a larger tub, 2x3, like all Duravit corner baths, is also available with an integrated whirl system.

With the Happy D. corner bath with integrated apron, the design is, once again, unmistakable and harmonious. With variants for left and right-handed corner baths, the Happy D. tub is suitable for all architectural conditions. Its ergonomic backrest, which is angled at 30° creates soothing comfort while an optional, integrated whirlsystem promises an extra-relaxing bathing experience. The Happy D. corner baths are also available with furniture panelling and as built-in tubs.

Paiova is available as a one- or two-person bathtub. Design by E00S.

(left) Comfort is the driving force behind the unusual design of the Paiova bathtub: its trapezoidal shape offers space for two people to lie side by side. Bathtub panelling in American Walnut (real wood veneer). **(1)** It's even more comfortable with the optional neckrest. **(2)** The step that matches the bathtub panelling in American Cherry (real wood veneer) makes it easier to get in and out. **(3)** Practical companion: the spacious mobile storage unit. **(4)** The optional handle on the rim of the bathtub serves as an additional entry support.

Extras that do you good

There's one thing above all that you want to experience in the bath: relaxation – an effect that can be maximized with whirlpool and lighting systems from Duravit.

The Starck whirlpool in action, remote controlled from the rim of the bathtub. A Duravit bathtub can be fitted with five different whirlpool systems, ranging from the "simple" air system with air jets on the base of the bath to the Combi-System L, which combines the individual air and jet systems (water jets installed on the side), jets for back, foot massage and a halogen spot-light. Unlike the LED lights that are also available, the halogen light only truly comes into its own in combination with water.

Mobile, easy to use, uncomplicated: the remote control can be used to operate all colored lights in a Duravit bathtub. With a graphic, comprehensible design, waterproof and easy to care for, the remote control withstands all bathing activities.

The positive effect of color on the human psyche has been medically proven, while light is successfully used for therapy. Colored light can also be used at home, in one's own bathroom, for relaxation and to boost wellbeing. Duravit bathtubs with integrated colored light and LED lights set into the sides of the bathtub create a tranquil, soothing atmosphere. Individual color shades can be selected or they can be set to change subtly at regular intervals. Select from five different programs.

(1) Air nozzles: pre-heated air bubbles surround the entire body to stimulate the circulation and relaxation of the nervous system. **(2) Jet nozzles:** a mixture of water and air gently massages the back, thighs and calves. The bubbles stimulate the tissue under the skin, providing relief for muscular pain and tension. **(3) Rotojet nozzles:** rotating water-and-air massage nozzles gently massage shoulders, lumbar regions and feet to stimulate circulation, increase muscular function and strengthen the organism. **(4) Halogen spotlight:** this creates an even more pleasant bathroom atmosphere. **(5) LED spotlight:** White light, specific colors and light programs can be both selected and dimmed via remote control. Unlike the halogen spotlight, the LED spotlight can also be used without water as additional atmospheric lighting.

Control unit

Combi L control unit

Combi E control unit

Air system. Air system. pre-heated air from 12 (with Blue Moon, 24) air nozzles set into the base of the tub bubbles gently around the entire body.

Jet system. Six water-air nozzles arranged in the side wall create a beneficial massage effect. The intensity of the massage jet is regulated via an air controller on the rim of the bathtub.

Combi-System P. The positive action of the air-and-jet system is combined in the Combi-System P. In addition, the Combi-System P is fitted with two rotating foot massage jets. It is operated via two pneumatic switches and one air controller fitted onto the rim of the bathtub.

Combi-System E. The Combi-System E electronic control offers special comfort. The massage intensity of the air and jet system is regulated independently via an integrated control panel. The standard equipment also includes an electronic dry run protection. The Combi-System E can be individually extended to include the additional modules for back and foot massage, temperature, hygiene management and light.

Combi-System L. When touched, the control unit lights up in blue. The air and jet systems, which are included, halogen spotlights (with Blue Moon, two spots) and the back and foot massage jets are all easy and convenient to operate from the compact panel. The standard equipment also includes an electronic dry run protection. The Combi-System L can be individually extended to include the additional colored light as LED spotlight (p. 230), temperature L and automatic UV hygiene management modules.

* With water channel and specially treated stones or wooden inserts, 2320 x 1420 mm
** Built-in version

In the bathroom, in the living room or on the terrace... designed by E00S, **Sundeck** can be set up wherever there is a hot water connection. The practical cover keeps the bathwater at a desirable temperature. But there's more: it folds together to become a comfortable headrest and can be closed to create a relaxing lounge.

Design by E00S

Sundeck

An all-in-one bathtub, lounge and wellness source: Sundeck for twice the amount of relaxation – both indoors and out.

The free-standing version of Sundeck is available as a single-seater (190 x 90 cm) and two-seater with two sloping backrests (210 x 90 cm). Tub paneling is available in a choice of eight real wood or wood décor veneers.

(1) The upholstered cover folded together to form a headrest. **(2)** The whirlpool and color programs can be operated by remote control. **(3)** The hand-sewn white cushions and neck rolls make for additional comfort. **(4)** An upholstered white fabric step (109 x 28 x 14 cm) makes it easier to get into the bath. **(small picture)** When Sundeck is installed outdoors, a tarpaulin keeps the tub and the water clean.

Indoors, Sundeck also provides the ultimate vacation-like retreat: shown here with real wood Macassar veneer panelling.

For those who prefer to install the tub in their own unique way, Sundeck is available as a built-in tub, shown here as a two-seater with two sloping backrests, 190 x 90 cm. A single-seater, 190 x 90 cm, and an XL two-seater, 210 x 90 cm, are also available as built-in versions. And for those who would like to experience something more when bathing, the optional Duravit whirl-pool systems and LED colored lights are available for all versions. **(small picture)** Sundeck as a lounge with closed cover.

Pillar

Attractive, technically sophisticated and easy to install: the Duravit tap pillar is the ideal solution for freestanding bathtubs.

Design by Duravit

The tap pillar is available in 1100 mm (with adjustable feet) and 1180 mm (specially-designed for the Blue Moon bathtub). The finish is available in various shades of wood to match all of Duravit's bathroom furniture ranges. It is supplied pre-installed for all flush-mounted tap fitting systems from Dornbracht, Grohe, Hansa and Hansgrohe, and also has the capability to be connected to a hand-held spray and bath inlet. The removable rear panel allows for easy access and inspection. In addition to Duravit bathtubs, the tap pillar can also be combined with a variety of other free-standing bathtubs.

Blue Moon

Blue Moon is the ultimate in feel-good bathing — and a high-quality design object.

The more water, the more room, the more depth...the better. With its square body and circular tub and an immersion depth of 510 mm, the elegant **Blue Moon** tub embodies design in its purest form. Immerse yourself completely in water colored with light. Because only the user's back touches the tub, a feeling of pleasant floating weightlessness takes over – and this becomes even more pronounced in the larger version of Blue Moon.

Design by Jochen Schmiedem

(1) A corner yields comfort: thanks to its innovative geometry – larger surface and, in the lower part, vertical backrests – with a length of just 163.5 cm, Seadream offers a generous standing area for showering and maximum comfort when bathing. **(2)** The step facilitates access. **(3)** The real-glass shower partition can be swivelled 180°. **(right)** Although visually compact, Seadream offers the same bathing comfort as a larger bathtub: it is possible to stretch out and enjoy a bathtub that is a wonderful 480 mm deep.

Shower trays

The models from the Starck range show just how a shower tray can become a design object. Clear and minimalist lines that are aesthetically refreshing and meet all practical requirements. The Starck shower trays are available as built-in models in sizes ranging from 80 x 80 cm to 180 x 90 cm and are suitable for showering together in comfort but also for use with just one shower unit (**left**). The inserts made of solid teak are an attractive option (**top**).

** Starck X wooden inserts are available for these shower trays

The brainchild of Sieger Design, the 2nd floor shower trays offer an invisible outlet, which sits under an acrylic cover. This results in a continuous, clear and unadorned design. The shower trays are available as built-in versions or, upon request, with wood panelling, in four different finishes. All variants are available in sizes ranging from 80 x 80 cm to 180 cm x 90 cm (left). All Duravit shower trays are also available with a special, transparent, anti-slip coating.

Showers are great, of course, but the **Multifunctional Shower** from Duravit is revolutionary in form, function and effect. Designed by Jochen Schmiedem, it is reminiscent of a luxury getaway. Pure wellness – in all facets – awaits the user behind a real glass partition. The massage and steam shower functions are operated by remote control. An incredibly enjoyable experience, the multifaceted Multifunctional Shower provides freedom of movement whether one showers alone or with a partner or wants to sit or lie down on the comfortable, water-resistant wooden benches. The inviting wooden slats are water-resistant too.

Design by Jochen Schmiedem

In the realm of the senses

Showers, massage showers, steam showers... ultimate relaxation. The Duravit Multifunctional Shower is a genuine all-around talent when it comes to soothing comfort.

(1) The large flood showerhead streams a warm rainshower from above. **(2)** The 10 massage jets can be set to a pressure of up to 4 bar to provide a professional massage of the shoulders, back and lumbar region. **(3)** The integrated Kneipp hose for alternate hot and cold rinses invigorates the blood circulation and metabolism and purifies the system. **(4)** The stream from the surge head refreshes like a small waterfall. **(right)** A transparent version of the glass partition is available.

Massage intensity, duration of steam bath, dimming of halogen light, speed of colored light sequence.

Program (massage, colored light, steam)

Surge head on/off
 Creates a waterfall shower effect.

Colored light
 The colored light module (optional) offers five preset light sequences or a single color.

Twin massage jets on/off, program selection.

A wealth of ideas

Washbasins, WCs, bidets and urinals treated with **WonderGliss** stay clean and attractive longer. After the initial firing, WonderGliss is baked into the ceramic by means of a special method.

The **floor-standing washout WC** with Cascade flushing technology and Vario outlet were designed for a wide variety of different connection types and dimensions. Whether vertical or horizontal outlet, almost all connections are easy to install

Glazed flushing rim. All Duravit WCs are fitted with a glazed and easy-care flushing rim, which prevents the accumulation of dirt and residue and guarantees the optimum flow of water over the entire flushing surface.

Holds and holds and holds...Duravit's patented Durafix attachment system is particularly quick and easy to install and also completely invisible. It is used with many wall-mounted WCs and bidets, including the Starck X and Starck 1 ranges.

Semi-pedestal attachment. Thanks to the quick-fitting system, almost all Duravit semi-pedestals can be easily fitted to their matching washbasins and handrinse basins. And, thanks to the simple and sensible attachment technology, the semi-pedestal fits flush against the washbasin and wall.

the stool. Furthermore, there are no splashes when using the WC. With **Cascade flushing technology (1)**, by changing the seat position, it is also possible to examine the stool. The ceramic tongue prevents any unpleasant splashback. Another advantage is the fact that odors are kept at minimum. **Washout technology (2)** is the flushing technology associated with the lowest amount of unpleasant odors. The floor-standing washout WC with Cascade flushing technology and Vario outlet was developed for a wide variety of connections and dimensions. Whether you're working with a vertical or horizontal outlet, connection and installation is done with ease.

When space is at a premium. The Duraplus compact wall-mounted toilet with a minimum projection of 46 cm, the compact wall-mounted toilet from the Starck 3 range with a projection of 48.5 cm and the new D-Code wall-mounted toilet with a projection of 48 cm.

The Comfort wall-mounted WC with **raised seating position** offers real progress in terms of comfort. At 50 mm higher than standard WCs, it can be installed without modifying the inlet and outlet and offers both the tall and the elderly greater comfort when sitting and standing up.

Dual Flush. With the two-volume technology (3 or 6 liters), a household of four can save more than 40,000 liters of water/year. Press the small button for the small flush volume. A minimum flushing volume washes away liquid waste in a clean and hygienic manner. If you wish to use the full water volume, simply press the large button.

The **target fly** positioned in the urinal encourages a more accurate aim.

A gentle tap is all it takes and the WC seat lowers automatically and closes gently and quietly. **SoftClose** is available as standard with the 2nd floor, Starck X, Vero and Starck 1 WCs, as well as with many other ranges.

What fantastic furniture!

Three cheers for craftsmanship. Technologically-advanced features are certainly coveted when it comes to new bathroom furniture. What makes Duravit products unique, though, is the fact that all finishing touches on these pieces are performed by hand. The care that Duravit applies to the manufacture of its products is also reflected in the ongoing, meticulous quality controls that are carried out both during and after completion of all manufacturing stages, including: inspection of incoming goods, production, final inspection, functional testing.

Precision work. It's important that furniture subjected to great wear and tear is made with the highest precision. In a damp environment like the bathroom, every millimeter counts. Duravit bathroom furniture is characterized by high precision and careful craftsmanship. A defined miter joint (the right-angled connection between two parts) significantly increases the stability of the furniture. The use of a special adhesive protects against water.

Please handle with care. We think that life is loud enough. This is why Duravit uses SoftClose technology – an automatic closure system with end damper – which ensures that drawers close smoothly and quietly. The drawers are braked to the last 10 cm and then close automatically. And that's not all: even if you inadvertently use a little too much force when opening or closing the drawer, it will still come to a slow and gentle stop.

It's like magic! Everyone knows what it feels like when your hands are wet – or even worse, dirty – and you have to switch on the light. This is no longer an issue thanks to the Duravit mirror with integrated lighting. Specially-developed for use in the bathroom, the mirror with integrated lighting features a sensor control that activates the light when it detects hand movement. A fantastic idea: light controlled like magic – and no more dirty light switches. Mirrors/mirror cabinets with sensor control are available for the 2nd floor, Fogo and Starck X ranges.

Functionality included. What does a product have to be able to do? How is it possible to create order? What makes life in the bathroom easier? These are all questions that Duravit addresses when developing its bathroom furniture – and questions that are easily answered by the finished products. No area is unused, maximum storage space is offered – and there are myriad solutions for bathroom toiletries, the hairdryer, and pesky cables.

Don't get caught in the dark! For Duravit, optimum light management also includes non-glare lighting. e-mirror features special reflectors that allow light to shine at the most comfortable angle, ensuring ideal lighting without glare. Inside the cabinets, illuminated glass shelves (e.g. with Fogo) or fluorescent tubes (e.g. e-cabinet) also ensure premium, non-glare lighting.

Everything in its place! Fully extendible and removable without tools, the drawers in Duravit bathroom furniture not only enable the user to make maximum use of their interiors, they also facilitate cleaning. Many pieces of furniture from the 2nd floor, Fogo, Happy D. and X-Large ranges come standard with interior drawers that feature clever plastic box compartments and individually adjustable glass divisions. This creates more space, provides added practicality and allows for easy maintenance.

As if asleep. There's no getting around the fact that some of us have to get out of bed during the night to answer the call of nature. However, one thing we can control those during those wee small hours is the amount of light we use to illuminate our path to the bathroom. "Night mode," a practical feature integrated into many of Duravit's illuminated mirrors and mirror cabinets, allows users to do just that: it lights the way to the bathroom during the night without being overly-bright or imposing. And, a key benefit: this feature saves valuable energy.

Bathtubs in detail

Two bathtubs with generous depth. Anyone who enjoys taking a bath knows it's most enjoyable when you're deeply – and comfortably – submerged in the water. This is why Duravit offers very deep bathtubs. Seadream is 480 mm deep and Blue Moon is an amazing 510 cm deep – and each guarantee that the entire body is deeply submerged during a bath. The Blue Moon bathtub overflow is covered by a clever wood or acrylic insert.

Let there be colored light! Color has a considerable impact on our sense of wellbeing. As such, there are even more benefits to enjoying colored underwater light in Duravit bathtubs and whirlpools fitted with LED spotlights. White light, six colors and five light programs can be both selected and dimmed via remote control. With the Combi-L whirlpool system, it is possible to select either a continuous color or a combination of all colors via the control panel on the bathtub's rim.

Natural beauty. The Duravit universal bathtub panelling with wood finish is a particularly attractive idea. Held in place via the innovative EasyClick (small illustration) connection system, it can be easily removed at any time, e.g. for maintenance or repair work. Offered in different wood finishes, the panelling is available for installation in corners, niches and in front of the wall for bathtubs from the Starck, Vero and 2nd floor ranges.

Modelled after nature. The waterfall tap for the 2nd floor range is a good example of how wellness and nature are related – and also an example of how attractive functionality can look. A simple right angle, harmoniously integrated into the bevel, allows the water to flow in a broad, flat surge into the bathtub. And it's no coincidence that it evokes images of a waterfall in untouched nature.

Plugs. The old bath plug is an element of the past. Thanks to the push-open technology from Duravit, the drain outlet is opened and closed via a simple tap of the foot. Duravit offers baths with push-open technology for Sundeck, Starck X, Blue Moon and 2nd floor ranges, the latter of which features an "invisible" outlet since it is covered with a sanitary acrylic insert.

Multifunctional. The cover is what makes the free-standing, mobile Sundeck bathtub so special. Sundeck is covered in high-quality marine-like fabric (customary in yacht-building) that serves several functions, including keeping the bath-water warm until you climb in. Folded back, the cover provides the bather with a comfortable headrest. Folded out, it becomes a relaxation deck and storage shelf. And—all this comes complete in an elegant, maritime look. Welcome aboard!!

Overflows are allowed. The all-around overflow rim on the Sundeck and Starck X bathtubs offers a particularly pleasant and carefree bathing experience. Like a moat running around its perimeter, the overflow channel allows for water to be filled to the very top of the bathtub. Completely immersed in wonderfully warm water, the bather only has to switch off, dream and enjoy the bath...because after all, it doesn't matter if it overflows!

Would you like a massage? There's nothing better than a good massage – in the Duravit multifunctional shower. 10 massage jets with a force of up to 4 bar operate within a closed water circuit with a 40-l reservoir. Individually controlled or set to one of five different programs, the user can enjoy a powerful water massage that stimulates the circulation and refreshes the entire body.

Thanks to the all-round water channel with pure teak wooden insert, it doesn't matter at all if water flows over the Starck-X rim.

What fits where?

Furniture washbasin from the Starck 3 range
Washbasin vanity unit from the X-Large range

Washbasin vanity units for furniture washbasins. The vanity units are designed to fit furniture washbasins. Together, the washbasin and vanity unit form a harmonious whole. The combinations of furniture washbasins with matching vanity units offer generous surrounds on the edge of the basin and lots of storage space.

Console basin from the Bacino range
Washbasin vanity unit from the X-Large range

Washbasin vanity units and consoles for console basins. Washbasin vanity units and consoles for console basins. When paired with a vanity unit, console basins provide a modern alternative to the traditional washbasin. The bowls and basins introduce individuality into the bathroom, while the matching washbasin vanity unit offers space for all bathroom necessities and toiletries while maintaining generous "surround" space.

The natural feel-good factor

A veneer comprises thin slices of wood that are produced either by sawing, cutting or peeling the trunk of a tree. They are then adhered to a substrate. As with every tree, each real wood veneer is a unique piece of nature. Every piece of veneered furniture is thus unique and the differences in structure and color indicate the distinctiveness of the materials used. With their great aesthetic appeal, real wood veneers give our bathroom furniture a high-quality look and are also warm and pleasant to the touch. To ensure that this remains so for a long time to come, the surface of the wood is also protected with a layer of melamine resin.

Authentic design

Wood décor consists of a natural-looking décor layer soaked in melamine resin and several support layers. These are compressed to form a robust surface that is light and UV-resistant, as well as easy to clean. The ABS profile is attached to protect the edges; it is scratch- and impact-resistant. The wood décor is machine-made to guarantee that it will retain its look for years to come. Painted surfaces have several layers of paint to guarantee a particularly high-quality look and finish.
